

## SUPERTECHNO - technical notices for video

### For Remote Head – configuration we will need :

- Camera
- Camera Baseplate
- Triax cable type: A2 with connector Lemo 3T or Fischer 1051 between Camera and Broadcast truck
- Lens (zoom)
- Zoom servo / Canon or Fujinon
- Focus servo / Canon or Fujinon

*The Iris and the camera power supply is controlled by the Broadcast truck via the Triax link*

### For the Console, what we need :

#### Tally :

- We need Tally wire with Bnc, XLR 3 or Banana jack (Voltage or contact ).

#### Intercom :

- Universal interface for 4 wire systems with XLR 3 connectors at line level.

#### Video :

- 2x BNC wires ( Program & Remote Head camera).

#### Power supply :

- Our SUPERTECHNO crane needs a 220 / 240V AC 16 Amp with Broadcast truck potential.
